

Web tool for monitoring implementation with S-TIME-DISTANCE updated

Thursday, 10 January 2008

Web tool for monitoring implementation with S-TIME-DISTANCE is updated with input files for 4 EU structural indicators.

This advance preparation of input files for four selected structural indicators is designed to facilitate the user to start the application without having to do the task of preparing input files from official data for these indicators for established targets:

- Total employment rate Lisbon 1 target 70%
- Employment rate females Lisbon 1 target 60%
- Employment rate for older workers Lisbon 1 target 50%
- R&D in GDP Lisbon 1 target 3%
- R&D in GDP NRP targets

1. Go to the input files

2. For S-time-distance tables for countries
